

Trilliant is Connecting the World of Things®

HYBRID WIRELESS COMMUNICATIONS

- Only mission-critical communications platform integrating multiple communication technologies
- Built for interoperability with a large ecosystem of partners, enabling customers to adapt to continuous innovation and capture future opportunities as customer needs evolve

GLOBAL CAPABILITIES

- Utilizes globally available and unlicensed 2.4 GHz and 5.8 GHz frequencies to serve international regions with varying communication requirements and challenges
- Deep experience serving leading energy providers globally has created “knowledge bank”

MISSION CRITICAL COMMUNICATIONS

- Based on the latest “utility grade” security standards
- Exceptional coverage, performance and capacity on a secure, scalable, flexible and reliable network.
- 10+ years of connecting critical infrastructure for the global energy industry

WE ARE MAKING CONNECTIONS

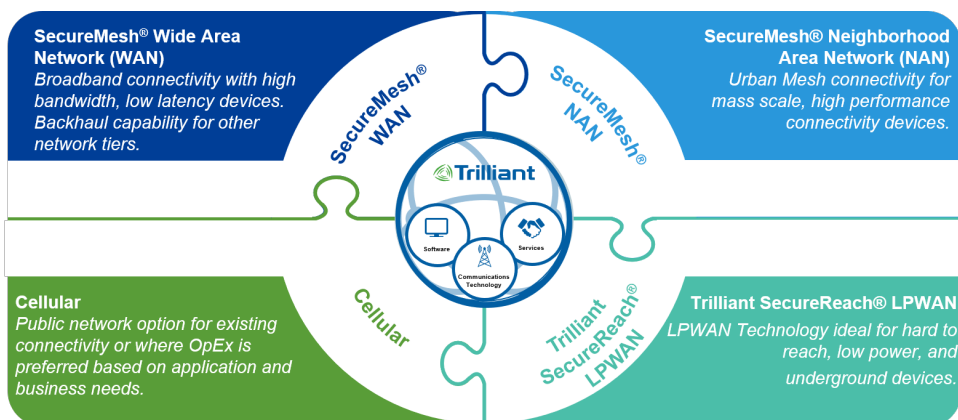

Trilliant is a connectivity company. We provide infrastructure solutions that enable actionable intelligence with an open and secure communications platform and approach.

We believe that the next generation smart grid built on a network that allows for the frictionless exchange of data will propel the industry to a bright future. Our advanced technologies are designed to work with virtually any system to provide a secure, powerful source of data now and for generations to come.

WHY TRILLIANT?

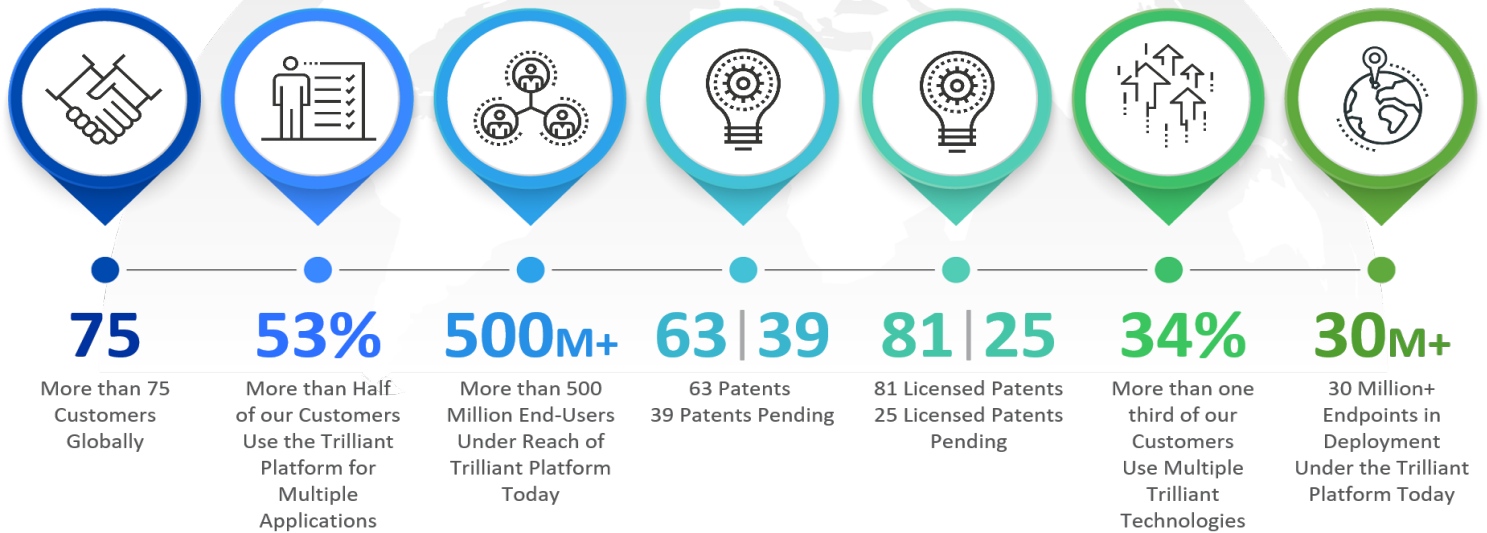

Trilliant offers a universal communications platform that is at the convergence of smart grid, smart city and global Industrial Internet of Things (IIoT) applications. We bring together multi-technology solutions, global capabilities, and mission critical communications to deliver future proof solutions.

We are a device agnostic, integrated, multi-technology communication platform that provides flexibility to balance technological capabilities with economic needs.

WE EMPOWER YOU - BY CONNECTING THE WORLD OF THINGS®

We are Energized by Our Market Presence:
