Overview

Trilliant deploys AMI in partnership with SAMART Telcoms for Provincial Electricity Authority (PEA), Thailand

Solutions

AMI enables PEA to improve real-time data collection efficiency for commercial and industrial customers

Benefits

The deployments support utilities in the pursuit of their environmental and sustainability goals through the continued streamlining of processes and enhanced management of energy services

Date

May 2022

SUMMARY

In May 2022, Trilliant, a leading international provider of solutions for Advanced Metering Infrastructure (AMI), smart grid, smart cities and IIoT (Industrial Internet of Things), partnered with [SAMART](#) to deploy Advanced Metering Infrastructure (AMI) for the [Provincial Electricity Authority of Thailand \(PEA\)](#). The deployment demonstrates Trilliant's continued commitment to utilities in the Asia Pacific region at market-leading performance levels.

"Trilliant is dedicated to providing innovative solutions for our customers across the globe," said Andy White, Chairman & CEO of Trilliant. "Our platform allows for the deployment of hybrid-wireless technologies that can be used effectively with a variety of applications, allowing utilities to provide top level service to their customers. Partnering with SAMART allows us to deliver our software platform to support multiple meter brand deployments."

PEA Thailand has awarded the contract to STS Consortium comprising SAMART Telcoms PCL and SAMART Communication Services.

"The fine selection of quality products from Trilliant, a world-class technology provider, has strengthened our solution offerings to PEA. We look forward to our long-term partnership and future collaboration in Thailand," said Mr. Suchart Duangtawee, EVP of SAMART Telcoms PCL.

Trilliant has already connected more than 3 million smart meters for customers in India and Malaysia, with plans to deploy an additional 7 million meters over the next three years through existing partnerships. With the addition of PEA, Trilliant's technology will soon be deployed in millions of new homes, helping utilities provide reliable access to electricity to their customers.

The continued deployments in APAC are a testament to Trilliant's purpose-built technology for utilities and communities. Recently recognized by Frost & Sullivan as the [2021 Asia-Pacific Smart Utility Communications Platform Company of the Year](#), Trilliant remains dedicated to its technology innovation path.

Trilliant has continued to collaborate with energy service providers to complete installs of smart meters, head end systems and communication hubs in a safe and timely manner. These deployments support utilities in the pursuit of their environmental and sustainability goals through the continued streamlining of processes and enhanced management of energy services.

About SAMART Telcoms PCL: SAMART TELCOMS GROUP provides solutions and services in ICT and digital innovation, including Network Solutions, Enhanced Technology, and Business Application ranging from consulting, system design, installation and implementation, operations, and maintenance as the leading and complete solution and service provider for clients in government and private sectors.

Trilliant® empowers the global energy industry with the only device-agnostic communications platform that enables utilities and cities to deploy any application securely and reliably on one powerful network. Our purpose-built portfolio is designed to offer the power of choice, without risk of customers being "locked in" with one technology provider or meter manufacturer. We are proud to offer mission-critical solutions that support AMI, Data & Analytics, Smart Metering, Smart Grids and Smart Cities. Customers worldwide benefit from Trilliant's unique combination of flexibility, sustainability and scalability that connects utilities and cities to the IIoT and a more strategic path to the Energy Transition.
